

The major-winning high contrast alignment, the shapes, counterbalance and components in Odyssey Works technology show our relentless dedication to create the highest performance putters in the world. And here's the big news, our new Fusion RX insert takes the best selling, best feeling, most trusted insert that's won more majors than any insert ever, and adds extreme roll. Does that sound good to you? Yeah, we thought so.

FUSION RX

Here's the long story short: we've taken our most legendary insert of all-time – the most Tour wins, best feeling, best selling, all that good stuff – and combined it with an unbelievable new roll technology.

Roll meets feel when we couple the White Hot backer with an ultra thin stainless steel mesh with our patented Metal-X roll pattern. Extreme Roll and Extreme Feel from an insert with no compromises.

FUSION RX INSERT

- Here's the long story short: we've taken our most legendary insert of all-time – the most Tour wins, best feeling, best selling, all that good stuff – and combined it with an unbelievable new roll technology.
- Roll meets feel when we couple the White Hot backer with an ultra thin stainless steel mesh with our patented Metal-X roll pattern. Extreme Roll and Extreme Feel from an insert with no compromises.

HIGH CONTRAST ALIGNMENT

- Tour proven high contrast alignment highlights the proper face angle from address to impact for alignment throughout your putting stroke.
- Silver and black contrast allows your eyes to key in on linear designs on the putter to accentuate the face angle and improve concentration.

MOST ACCURATE 2-BALL EVER

FUSION RX INSERT

Roll meets feel when we couple the White Hot backer with an ultra thin stainless steel mesh with our patented Metal-X roll pattern. Extreme Roll and Extreme Feel from an insert with no compromises.

FANGED STABILITY DESIGN

The Dual Fangs position the clubhead's weight to the perimeter to increase MOI, so center hits are on point and off-centers are really accurate too.

2-BALL/HIGH CONTRAST ALIGNMENT

Here's where it gets really good. We've taken two of our best alignment technologies we've ever created and brought them together. The 2-Ball alignment system revolutionized the modern putter. Versa alignment highlights it and makes it better.

TANK COUNTERBALANCE (OPTION AVAILABLE)

Added weight raises MOI to give more stability through impact, and engages the big muscles to promote a more pendulum stroke that helps keep the wrists from breaking down.

FEEL MEETS ROLL, DUAL FANG STABILITY AND MARXMAN ALIGNMENT

The Odyssey Works Versa Marxman Fang Putter is designed to give you all the alignment you need, because the most important part of putting is starting the ball on your intended line. You know that. This putter takes the 2-Ball Fang chassis that's one of the best selling models in the world and adds Hi-Def linear alignment from our proven Marxman technology.

This model has our best feeling, most trusted insert ever and quicker roll that gets the ball into a pure roll faster. And we combine that insert with major-winning alignment, the stability that makes it an accuracy machine from the perimeter-weighted fangs, and the Marxman high-definition alignment strip. Yes, you really get all that proven technology in one putter. We hope you're ready for it.

QUICKER ROLL WITH FUSION RX

We've taken our most legendary insert of all-time that's our best feeling, best selling, with the most Tour wins and combined it with unbelievable new roll technology for the Fusion RX Insert.

It's where feel meets roll as we couple the White Hot insert with ultra thin stainless steel mesh and our patented Metal-X roll pattern. There are no compromises, and it has faster roll than the White Hot insert, so it reduces skidding and gets the ball into a pure roll faster.

STABILITY AND FORGIVENESS FROM OUR DUAL FANG CHASSIS

We've taken the dual fang chassis from our 2-Ball Fang (the most accurate 2-Ball of all time) and used the chassis to position the clubhead's weight to the perimeter. This increases MOI, resulting in more stability, more accuracy and better control.

HIGH-DEFINITION MARXMAN ALIGNMENT

The two alignment stripes run the entire length of the putterhead to help you frame the ball and find your target line.

MAJOR-WINNING VERSA ALIGNMENT

You've seen how the world's best players trust this visionary alignment. The silver and black contrast lets your eyes key in on the linear designs to highlight the proper face angle from address to impact for alignment throughout your putting stroke.

ODYSSEY WORKS TANK & ARM LOCK

FUSION RX INSERT

- Here's the long story short: we've taken the most legendary insert of all-time – the most Tour wins, best feeling, best selling, all that good stuff – and combined it with an unbelievable new roll technology.
- Roll meets feel when we couple the White Hot backer with an ultra thin stainless steel mesh with our patented Metal-X roll pattern. Extreme Roll and Extreme Feel from an insert with no compromises.

ALTERNATIVE PUTTER DESIGNS TO FIND YOUR BALANCE

- Whether its stability through Tank counterbalance designs or an alternative to anchoring (Arm Lock), this lineup of putters are all about implementing the non-traditional methods that will give you the confidence to roll in putts.
- Tank counterbalance increases weight to help create stability for your most smooth and consistent stroke. The counterbalance weighting brings more weight above the hands to quiet them down and ensure a smoother stroke.
- Arm Lock uses the putter as an extension of your arm to promote a smooth, reliable stroke.

HIGH CONTRAST ALIGNMENT

- Tour proven high contrast alignment highlights the proper face angle from address to impact for alignment throughout your putting stroke.
- Silver and black contrast allows your eyes to key in on linear designs on the putter to accentuate the face angle and improve concentration.

All Tank putters come with a 15" SuperStroke grip.

FEEL MEETS ROLL AND ADJUSTABLE COUNTERBALANCE

Odyssey Works Tank Cruiser Putters take our revolutionary Versa alignment and adjustable counterbalance and put them together in Tour proven head shape models. They're part of Odyssey Works, a high performance technology platform that takes everything we know about putting and puts it to work.

These new putters have combined our best selling, best feeling, most trusted insert ever with quicker roll that gets the ball into a pure roll faster. And we've added the adjustable Tank counterbalance head weighting and grip weighting to find the putter balance you want for your most consistent stroke. Yes, you really get all that proven technology in one putter. We hope you're ready for it.

QUICKER ROLL WITH FUSION RX

We've taken our most legendary insert of all-time that's our best feeling, best selling, with the most Tour wins and combined it with unbelievable new roll technology for the Fusion RX Insert.

It's where feel meets roll as we couple the White Hot insert with ultra thin stainless steel mesh and our patented Metal-X roll pattern. There are no compromises, and it has faster roll than the White Hot insert, so it reduces skidding and gets the ball into a pure roll faster.

MAJOR-WINNING VERSA ALIGNMENT

You've seen how the world's best players trust this visionary alignment. The silver and black contrast lets your eyes key in on the linear designs to highlight the proper face angle from address to impact for alignment throughout your putting stroke.

ADJUSTABLE COUNTERBALANCE WEIGHTING

Adjust your head weight and grip weight to dial in your putter balance. This is how you get the feel and stability you want for your most consistent stroke.

Counterweighting: 5g, 15g and 30g options

TOUR PROVEN HEAD SHAPES

These are some of our most prolific models, and they continue to dominate on Tour. All of these putters have been validated over and over by the world's best players.
