

# Big Bertha OS Hybrids

**Product Name:** Big Bertha OS Hybrids

**Product One-liner:** Super-Charged Distance, Ultimate Forgiveness

**Who is this product aimed at:** The Super Game Improver

**Product Intro Date:** 07/09/16

**Product at Retail Date:** 30/09/16

**Tech Specs:** 3H (19°), 4H (22°), 5H (25°), 6H (28°), 7H (31°)

RH 3H-7H in Men's (LH in 3H-6H only)

RH 3H-7H in Ladies (LH available only in Men's heads)

## Product Intro

The Big Bertha name has long been synonymous with distance and forgiveness, and the Big Bertha OS Hybrid delivers new levels of both thanks to its deeper body, larger and faster face, and next-generation Face Cup technology. Any player who wants a hybrid that's super easy to launch high and long will want Big Bertha OS in the bag.

## Features & Benefits

### Distance Features

#### **Explosive Distance from Next-Generation Hyper Speed Face Cup**

Next-generation Hyper Speed Face Cup promotes faster ball speed across the face, especially on off-centre hits.

#### **Larger and Faster Face for More Ball Speed**

A larger and more flexible face helps in two ways: 1) The added size gives you more area to make contact with and 2) The added flexibility pushes the COR closer to the USGA limit, promoting faster ball speed for more distance.

### **Faster Head Speed for More Distance from Speed Step Technology**

Designed with the assistance of aerodynamic experts, Callaway's Speed Step Technology improves airflow to promote faster clubhead speed for more distance.

### **Control Features**

#### **Increased Forgiveness from a Refined Head Design**

Refinements to the head design include: 1) Longer heel-to-toe length that allows for a larger and more forgiving face. 2) Deeper body for increased MOI and stability. Together they make the Big Bertha OS Hybrids remarkably easy to hit.

#### **Exceptional Versatility and Distance from Optifit Adjustability**

Optifit Hosel technology lets you easily choose from eight loft and lie settings to dial in the launch angle and shot shape that promote maximum distance and accuracy with your swing.

### **Playability Features**

#### **Better Turf Interaction from our Dual Runner Sole Design**

The Dual Runner Sole design promotes better turf interaction for more consistently solid contact.

#### **Women's and Senior Models**

Women's and Senior models are engineered with slightly lighter heads and more loft to promote faster ball speed and higher launch angle to make it easy to get the ball in the air.

#### **Component Package**

Stock Graphite Shaft: UST Recoil ES 460

Stock Grip: Callaway Universal

#### **Custom Options**

Extensive list of premium aftermarket graphite shafts and grips.
