

Refined Shaping and Finish

The head shape is more compact, with a thinner topline and narrower sole width in a high-performance player's iron. And the sleek black PVD finish gives Steelhead Pro an unforgettable look.

Custom Options

A wide array of premium aftermarket steel and graphite shafts and aftermarket grips available.

Slip Sheet

More Speed and Distance from Next-Generation 360 Face Cup Technology

Increases ball speed with greater efficiency on both center hits and mis-hits for more distance on every swing.

Consistent Launch and Better Feel from Steel-Infused Polyurethane Layer

Absorbs unwanted vibration for great feel. Integrating steel into the urethane adds weight to lower the head's Center of Gravity for faster ball speed and consistent launch.

More Forgiveness from Hollow Bore-Thru Hosel Design

Saves weight that's repositioned in strategic places in the head to create more forgiveness and workability.

More Control and Distance from Progressive Center of Gravity Positioning

Positioned strategically in each iron to promote consistent launch and long carry in the long-irons, great workability and control in the middle-irons, and lower and high-spinning shots in the short-irons.

Refined Shaping and Finish

A more compact head shape, with a thinner topline and narrower sole width. And the sleek black PVD finish gives Steelhead XR Pro an unforgettable look.
