

Sure Out Wedge Media Summary Sheet

Renowned golf instructor Hank Haney has collaborated with Callaway engineers to create a new wedge that makes greenside shots – especially from sand and rough – incredibly easy to play.

It's called Sure Out, with performance that's led by the new Sure Out sole with enhanced camber and high bounce--designed to glide smoothly through sand and thick grass without the need to open the face.

“Sure Out allows you to simplify bunker shots by playing them with a square face,” says Hank. “For a lot of golfers that struggle with their short game, the Sure Out could be exactly the wedge they are looking for.”

The Sure Out sole is also designed to power smoothly through heavy grass, while the high degree of bounce helps eliminate fat shots for consistent distance control. Seventeen full-face grooves and an aggressive groove geometry helps you stop the ball fast even on off-center hits.

Sure Out is equipped with your choice of two premium shafts: a highly responsive KBS 90 steel or a lightweight 65 gram graphite option from UST.

Features & Benefits

Easy Explosions from Greenside Bunkers

New enhanced-camber, high-bounce Sure Out sole glides cleanly through sand without the need to open the face at address, generating easy, high, soft-landing shots.

Solid Contact for Consistent Distance Control

A wider sole and larger face area promote solid face-to-ball contact for optimal distance control.

High Spin for Fast-stopping Shots

17 full-face grooves and an aggressive groove geometry promote fast, shot-stopping spin even on off-center hits.

Premium Wedge-Specific Shafts

Lightweight steel and graphite options expressly designed to promote responsiveness and feel.

Lofts: 58 & 64

Length: 35”
