

# Callaway XR Speed Driver

**Product Name:** Callaway XR Speed Driver

**Product one liner:** Fast Just Got a Whole Lot Faster

**Who is this product aimed at:** Avid golfers of all levels

**What is this product replacing:** Callaway XR 16 Driver

**Product Intro Date:** 11/04/18

**Product at Retail Date:** 08/05/18

**Regions available:** Europe, Dubai, South Africa

**Available Lofts:** 9°, 10.5° and 13.5° HT. Right and Left-handed options available. Ladies options available in 10.5° and 13.5° HT (revised cosmetic)

**Adjustability:** OptiFit Hosel

**Tech Specs:** 460cc, 45.5" shaft, at 44.5" shaft length for Ladies (for further tech specs see Features and Benefits below)

**Product Intro:** The new XR Speed takes everything we know about Driver aerodynamics and face technology and combines it in our best performing - longest and most forgiving – XR Driver line ever.

## How Will Golfers Benefit?

**MORE DISTANCE** – From X Face VFT Technology.

**MORE FORGIVENESS** – From a lower CG, thanks to the inclusion of a Carbon Composite Crown.

## Features and Benefits Summary

### Our hottest ever face with the new X Face VFT

X Face VFT is the very latest evolution of Callaway's VFT (Variable Face Thickness) designed to maximise ball speeds across the entire face. X Face VFT is the lightest, most flexible and hottest face we have ever designed.

### Carbon Composite Crown To Increase MOI

The inclusion of a carbon composite crown on XR Speed is 45% lighter vs the XR 16 titanium crown, which significantly improves the mass properties and lowers the centre of gravity for improved forgiveness with increased distance.

### Faster head speed from a refined Speed Step

Refined aerodynamic efficiency with improved airflow over and around the head thanks to the latest Speed Step for faster club head speeds.

### Ultra-premium shaft as standard

One of the most premium aftermarket shafts available (used in the super-premium Epic Driver), the Project X HZRDUS shaft is now available in the new XR Speed Driver.
