

ARTIFICIAL INTELLIGENCE. REAL BALL SPEED.

New Flash Face Technology for Unprecedented Ball Speed
Callaway used Artificial Intelligence and Machine Learning to create a new fairway wood face design that promotes increased ball speed for longer distance.

Forged Carpenter Steel Face Cup For Fast Speed
Forged 455 Carpenter Steel combines with Face Cup to create fast ball speed across the face, for distance on center- and off-center hits.

Jailbreak Technology for Fast Ball Speed
Our innovative Jailbreak Technology incorporates two internal bars that stiffen the body, placing more impact load on the face to promote fast ball speed.

New OptiFit Hosel for Easy Launch and Optimal Flight
New shorter, lighter hosel system. The saved weight helps to reposition the CG for easy launch and long-carrying flight, and allows us to combine Jailbreak and adjustability for the first time in a fairway wood.
