STROKE LAB

FEATURES & BENEFITS

DEEP DIAMOND GROOVE FACE MILL

Our distinguishing diamond mill pattern has evolved to feature full grooves throughout the face. The result is the softest milled putter that we've ever built, while promoting improved immediate forward roll at impact.

PREMIUM MILLED PERFORMANCE

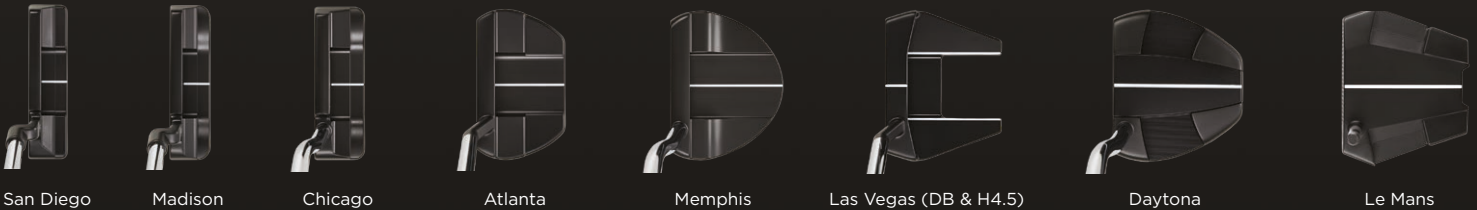

Toulon putters are the best performing milled putters in golf, and the top players in the world are taking notice. We've already earned 38 global wins in just a few years, and we're committed to setting the industry standard for premium designs.

BLACK EMERALD STROKE LAB SHAFT

Our latest generation shaft was introduced last season, and now features even better performance than the original! By shortening the steel section, we reduced the weight by seven grams. We also made it stiffer and more stable for even more consistency in your stroke, and your performance.

MIDNIGHT BLACK FINISH

Toulon is widely recognized for its premium look and construction. The beautiful black finish has been tested and proven on Tour, and showcases the meticulous craftsmanship of these milled putters.
