

OUR FASTEST FAIRWAY WOOD EVER

THIS IS SPEED TUNED

The New Rogue ST Family represents the next step in our quest to continue pushing the boundaries of innovation. Like a Formula 1 racing team that analyzes and makes improvements to every element of the car to achieve maximum performance, our R&D and Engineering teams have re-invented, refined, and improved every element of each club while developing the Rogue ST Family.

CORE TECH

ALL NEW JAILBREAK ST

New A.I. Jailbreak Design is speed tuned to create more stability by pushing the structure to the perimeter. This allows the face cup to flex more, creating incredible ball speed.

NEW TUNGSTEN SPEED CARTRIDGE

Allows for a precise, forward CG location promoting optimal launch and more ball speed.

SPEED TUNED A.I. FACE OPTIMIZATION

New A.I. optimization formula now includes speed, launch and spin. It's unique for each model and each loft.

HIGH STRENGTH C300 FACE CUP

Specially treated high strength steel for more ball speed and ball speed consistency.

ROGUE ST MAX D

The Rogue St Max D is for the player who needs more draw bias in their fairway woods. It's also our highest launching Rogue ST Fairway model.

Rogue ST Max D Fairway Wood Specs

MODEL	3W	5W	7W
LOFT	16°	19°	22°
LIE	58°	58.5°	59°
LENGTH	43.25"	42.75"	42.25"
CLUBHEAD VOLUME	180cc	154cc	140cc
