Price: £269

Product Intro:

Stroke Lab has completely changed putting forever with our revolutionary, multi-material Stroke Lab shaft. This design actually helps to improve the tempo and consistency in your stroke, and the performance is nothing short of incredible. It's engineered to make you a better putter, golfers absolutely love it, it's winning major championships and big events around the world, and it's helped Odyssey become the #1 Putter on EVERY Tour.

This lineup has completely revolutionized the category, but we're still obsessed with pushing the boundaries of innovation. That's why we've advanced this remarkable line even further with our new Bird of Prey, featuring one of the most distinct head shapes we've ever made; and that's saying a lot. It provides the Stroke Lab weighting you want for more consistency, and we've enhanced the forgiveness, alignment, and insert technology like never before.

The multi-material head construction promotes exceptionally high MOI for more stability. Our new Microhinge Star Insert creates a firmer feel and pleasing sound at impact while providing the same roll characteristics of our Tour-proven White Hot Microhinge. And with hi-def alignment it's easy to find the right setup at address. Our best performance technologies are engineered into the Bird of Prey with one simple goal: to help every golfer make more putts.

Features & Benefits

Stroke Lab Weighting To Improve Your Stroke

The innovative multi-material shaft saves 40 grams of weight, which is redistributed to the head and grip end of the putter. This completely rebalances the putter for improved

tempo and consistency in the stroke, and this major-winning technology continues to dominate on Tours around the world.

Multi-Material Super High MOI Designs For More Forgiveness

Creates exceptionally high MOI from a multi-material construction, making Bird of Prey extremely stable and forgiving on off-center impacts.

New Microhinge Star Insert For Outstanding Feel, Sound and Roll

Provides a firmer feel and enhanced sound at impact while maintaining the same roll benefits of our Tour-proven White Hot Microhinge Insert. It's already the choice of some of the best player's in the world.

Hi Def Alignment

Our High Def Alignment makes it easy for golfers to aim better at address, a critical component to better and more consistent putting.

New Ten Shape

Inspired by our popular #7 and Indianapolis shapes, the Ten offers premium materials and performance in a forgiving mallet.

New Bird Of Prey Shape

With a striking head shape that helps you easily frame the ball at address, the Bird of Prey offers premium materials and performance in a forgiving mallet.

Short Description: The Odyssey Stroke Lab Ten & Bird of Prey Putters are a super-high MOI mallet with a multi-material Stroke Lab shaft to improve your stroke, a new Microhinge Star Insert, and Hi-Def Alignment.
