

DISTANCE

ANY WAY YOU SWING IT

Fast Ball Speeds From Flash Face SS21

Fast ball speeds across an expansive area in each model and loft, with our advanced A.I.-designed Flash Face. So you'll hit it long, even if you miss the center of the face at impact.

Straighter Ball Flight From Increased Offset

We've added more offset to help reduce your slice or big miss. This increased offset helps to promote a straighter ball flight for more distance.

Enhanced Launch and Trajectory Control From Dual MIM'ed Tungsten Weighting

Optimized CG for launch and stability from precisely shaped dual MIM'ed tungsten weight.

Increased Ball Speed And Easy Launch

Fast ball speed from two internal Jailbreak bars that connect the sole and crown, so the face can take on more of the load at impact. And to create higher MOI in a forgiving shape, we've used a significantly lighter carbon crown that allows us to redistribute weight.

Enhanced Launch and Trajectory Control From Dual MIM'ed Tungsten Weighting

Features a completely new RCH shaft, designed by Callaway to specifically enhance the Big Bertha offering, with an Active Tip Flag section for easy launch. And it comes stock with a Golf Pride Tour Velvet Soft Grip.

*Effective Jan 1, 2020, all club lengths will be based on USGA measurement procedures. Some measured and thus published lengths have changed but the actual club lengths are the same as previous models. Shaft specifications may vary due to cut length and manufacturer tolerances. Shaft weights supplied indicate weight class (40/50/60/70g). Actual weight is dependent on flex and cut length.
