

Big Bertha B-21 Driver

Product Name: Big Bertha B-21 Driver

Product one liner: Distance Any Way You Swing It

What this product is replacing: New product

Product Intro Date: 18/08/2020

Product at Retail Date: 10/09/2020

Product Intro:

Every golfer wants to hit their driver a long way, and they want it to fly straight so that their ball finds the fairway. That's obvious to any player, but for most of us it's a lot easier said than done. And if you're typically hitting a slice or struggling with a consistent ball flight, you're not going to bomb it off the tee as often as you'd like to. We know that you could be hitting the ball farther, and that's why we're bringing out the new Big Bertha B-21. This is distance any way you swing it.

It's everything that you would expect from a Big Bertha with advanced technologies that make this driver really long, forgiving, and easy to hit. What makes it truly extraordinary is that it's our first driver that delivers the unique combination of high launch, low spin and significant draw bias in a forgiving head shape. It's a new formula for distance, built to take the big miss out of your game and to invite you back to the fairway.

And it's a total ball speed package, with our A.I. Designed Flash Face SS21, TA-15 Super Strength Materials, and our innovative Jailbreak Technology that can help you hit it a long way even if you miss the sweet spot. If you're looking for a new way to get the most distance out of your swing, than this is the driver that you need in your hands. Have fun.

Features & Benefits

Unlock Your Inner Distance

If you want to hit the ball farther, you have to hit it straighter. And to help eliminate your slice or big miss, we've created our first high launch driver with an ultra-low forward CG for low spin. It's a new formula for distance to give you a more consistent ball flight, and more tee shots that find the fairway.

Easy to hit from Bertha shaping and added draw bias

The large Big Bertha head is specifically engineered with internal draw bias weighting to help improve your launch angles and promote a straighter, longer ball flight.

Fast ball speed from our A.I. Designed Flash Face SS21

We've advanced our A.I. designed Flash Face to promote fast ball speeds across a more expansive area. So you'll still hit it a long way, even when you miss the center of the face at impact.

TA-15 super strength materials for consistent, high ball speeds

This face architecture requires extremely strong materials that are lighter and stronger than traditional titanium to promote optimal speed, forgiveness, and spin characteristics.

Jailbreak + T2C Triaxial carbon crown for ball speed and unconventional forgiveness

Two internal Jailbreak bars connect the sole and crown to promote fast ball speed, and the significantly lighter carbon crown allows us to redistribute weight for higher MOI.

Premium components package

Features a completely new RCH shaft, designed by Callaway to specifically enhance the Big Bertha offering, with an Active Tip Flag section for easy launch. And it comes stock with a Golf Pride Tour Velvet Soft grip.
