Product Name: X-Forged UT Irons

What this product is replacing: X-Forged UT 2018

Product Intro Date: 13/10/2020

Product at Retail Date: 29/10/2020

Product Intro:

Utility Irons are a popular choice on Tour, especially as a “fairway finder” off the tee and a versatile club into the green on Par-5s. And our new X Forged UT Irons are packed with Callaway’s best technologies in a confidence-inspiring, hollow body construction. For the better players who want a new go-to club in their bag, this is the player’s utility you’re looking for.

Features & Benefits

High Ball Speeds

Our A.I.-designed Flash Face Cup creates a sophisticated face architecture, for high ball speeds with outstanding spin robustness.

Extremely Soft Feel

Forged 1025 mild carbon steel and hollow body construction combine with our proprietary urethane microspheres for pure feel.

Enhanced Launch and Control

Our external MIM’d tungsten weighting allows us to precisely locate the CG position for optimal trajectory and launch. A longer blade length and a wider sole versus a traditional long iron provide forgiveness and control.

Premium Components

The Project X U is specifically designed to work with utility clubs for stability and control. The Project X HZRDUS Smoke Black HY is a player’s graphite shaft designed with low torque for aggressive swingers. Golf Pride’s Z Grip features a firm feel and exceptional traction.
